- reflective vest and additional reflectors to improve visibility.

General

Mandatory equipment must be carried with you from the start to the finish.

Spot checks of equipment may be carried out along the route and at the start.

Interruption

Come to the event well prepared and aware of the difficulty of the routes.

We hope that all participants will be able to complete the route from start to finish. However, if the trip is interrupted for any reason, please follow these steps:

- **Remember to report any interruptions to the competition center in all cases.**
+358 45 8678 818
- If possible, stop at a service station and inform the service station personnel.
- If you have to stop en route, wait for a service vehicle to pick you up.
- If you do not need the organizers' transportation, remember to inform the organizers of this as well.
- Remember to return the GPS tracking device with its bag to the organizer after the competition. We will charge €200 incl. VAT for unreturned GPS tracking devices.

General terms and conditions

The competition participant lists and results are public information and can be found on the service provider's website before and after the competition.

The organizer reserves the right to cancel or postpone the competition in the event of force majeure, when organizing the competition would be too dangerous or impossible, for example due to a natural disaster.

Responsibility of the event participant

Each participant is responsible for assessing their own fitness and the suitability of the vehicle they are using for the journey when registering. Typical ailments in a long race can include abrasions, blisters, dehydration, exhaustion due to lack of energy, as well as injuries and damage to the vehicle as a result of a fall. Participants must have internalized the idea that all their own actions to minimize the risks leading to injury are also part of their responsibility for the safe conduct of the event.

Participants should also note that although the organizer makes every effort to make the event as safe as possible, dangerous situations may arise due to traffic, road conditions, etc., which cannot be influenced in advance by the organizer.

The organizers have insurance for their own activities. However, all participants in the competition are at their own risk and are obliged to take out any insurance they deem necessary. We recommend that all participants have comprehensive accident insurance for the event.

Remember to return the GPS tracking device with its bag to the organizer after the competition. We will charge €200 incl. VAT for unreturned GPS tracking devices.

Rules and recommendations

The competitor must follow the rules and recommendations below. The competitor's performance may be disqualified or a time penalty may be given for failure to comply with the following rules and recommendations:

1. The event will be run on routes open to everyone, so you are always responsible for being aware of the traffic environment in which you are travelling.
2. All littering along the route is **COMPLETELY** prohibited. If you have any waste from nutrients or the like with you during the event, you can leave it in the trash can at the marked service points.
3. It is not permitted to service a competitor from a moving vehicle.
4. A competitor is obliged to help an injured fellow competitor or person outside the event; in this case, the time spent helping will be credited upon reaching the finish line.
5. Always respect and obey traffic rules and traffic controller signs.
6. Drive on the right side of the road and stay in your own lane. Pay special attention to intersections.
7. Please also always respect traffic outside the event. Being part of the event does not give you the right to commit traffic violations.
8. As a special feature, there may be reindeer on the route, so watch the benches and road for reindeer.

-
9. Please wear a helmet at all times when cycling. If your helmet requires adjustment or repair, do so only when you are completely stopped.
 10. Lack of mandatory equipment
 11. Deviation or correction from the route
 12. Cutoff expiration
 13. In the event of a serious accident, call the emergency number 112 immediately.
Competitors are recommended to charge their phones [112 app](#), with positioning.

The terrain is challenging and the distances are long! If the trip is interrupted for some reason, be prepared to wait. It takes 3-4 hours to get to the back of the race route on an ATV. This also emphasizes the importance of the mandatory equipment. Be aware of the challenge of the routes and where you are going!

Photos

The event will be photographed by the organizer. Photos may be published on the event website, in other organizer materials presenting the event, and elsewhere in the media.

After the event, the images will be available online. You can use the images for personal use if you wish. Instructions will be updated for the image distribution channels.

Feedback

We want to make the event better every year – that's why your experience is very important to us. We ask you to complete a post-race feedback survey, where you can share your thoughts on the arrangements, the route and the atmosphere.

Your feedback will help us make the competition smoother and more meaningful for all participants. We value your comments and suggestions for improvement – together they help us see the event through the eyes of the participants.

The feedback survey will open immediately after the competition and can be conveniently accessed via a link.

Every response is valuable. Thank you for taking a moment to help us make the next competition even more memorable!
